Key Metrics	16
Financial Statements	19
Additional Information	25

HIGHLIGHTS<sup>1</sup>

Profitability

7.6% operating margin in Q3<sup>2</sup>

\$1.8B GAAP operating income in Q3

\$1.9B GAAP net income in Q3

\$2.3B non-GAAP net income<sup>1</sup> in Q3

Cash

Operating cash flow of \$3.3B in Q3<sup>3</sup>

Free cash flow<sup>2</sup> of \$0.8B in Q3

\$3.0B increase in our cash and investments<sup>3</sup> QoQ to \$26.1B

Operations

4.0 GWh of Energy Storage deployed in Q3

More than doubled AI training compute

SUMMARY

Our main objectives remained unchanged in Q3-2023: reducing cost per vehicle, free cash flow generation while maximizing delivery volumes and continued investment in AI and other growth projects.

Our cost of goods sold per vehicle<sup>4</sup> decreased to ~\$37,500 in Q3. While production cost at our new factories remained higher than our established factories, we have implemented necessary upgrades in Q3 to enable further unit cost reductions. We continue to believe that an industry leader needs to be a cost leader.

During a high interest rate environment, we believe focusing on investments in R&D and capital expenditures for future growth, while maintaining positive free cash flow, is the right approach. Year-to-date, our free cash flow reached \$2.3B while our cash and investments position continues to improve.

We have more than doubled the size of our AI training compute to accommodate for our growing dataset as well as our Optimus robot project. Our humanoid robot is currently being trained for simple tasks through AI rather than hard-coded software, and its hardware is being further upgraded.

Lastly, with a combined gross profit generation of over \$0.5B in Q3, our Energy Generation and Storage business and Services and Other business have become meaningful contributors to our profitability.

(1) Excludes SBC (stock-based compensation)  
(2) Free cash flow = operating cash flow less capex  
(3) Includes cash, cash equivalents and investments  
(4) Calculated by dividing Cost of Automotive Sales Revenue by respective quarter's new deliveries (ex-operating leases)

FINANCIAL SUMMARY  
(Unaudited)

(\$ in millions, except percentages and per share data)	Q3-2022	Q4-2022	Q1-2023	Q2-2023	Q3-2023	YoY
Total automotive revenues	18,692	21,307	19,963	21,268	19,625	5%
Energy generation and storage revenue	1,117	1,310	1,529	1,509	1,559	40%
Services and other revenue	1,645	1,701	1,837	2,150	2,166	32%
Total revenues	21,454	24,318	23,329	24,927	23,350	9%
Total gross profit	5,382	5,777	4,511	4,533	4,178	-22%
Total GAAP gross margin	25.1%	23.8%	19.3%	18.2%	17.9%	-719 bp
Operating expenses	1,694	1,876	1,847	2,134	2,414	43%
Income from operations	3,688	3,901	2,664	2,399	1,764	-52%
Operating margin	17.2%	16.0%	11.4%	9.6%	7.6%	-964 bp
Adjusted EBITDA	4,968	5,404	4,267	4,653	3,758	-24%
Adjusted EBITDA margin	23.2%	22.2%	18.3%	18.7%	16.1%	-706 bp
Net income attributable to common stockholders (GAAP)	3,292	3,687	2,513	2,703	1,853	-44%
Net income attributable to common stockholders (non-GAAP)	3,654	4,106	2,931	3,148	2,318	-37%
EPS attributable to common stockholders, diluted (GAAP)	0.95	1.07	0.73	0.78	0.53	-44%
EPS attributable to common stockholders, diluted (non-GAAP)	1.05	1.19	0.85	0.91	0.66	-37%
Net cash provided by operating activities	5,100	3,278	2,513	3,065	3,308	-35%
Capital expenditures	(1,803)	(1,858)	(2,072)	(2,060)	(2,460)	36%
Free cash flow	3,297	1,420	441	1,005	848	-74%
Cash, cash equivalents and investments	21,107	22,185	22,402	23,075	26,077	24%

1

FINANCIAL SUMMARY

Revenue<sup>1</sup>

Total revenue grew 9% YoY in Q3 to \$23.4B. YoY, revenue was impacted by the following items:<sup>2</sup>

- + growth in vehicle deliveries<sup>3</sup>
- + growth in other parts of the business
- reduced average selling price (ASP) YoY (excluding FX impact)
- negative FX impact of \$0.4B<sup>1</sup>

Profitability<sup>4</sup>

Our operating income decreased YoY to \$1.8B in Q3, resulting in a 7.6% operating margin. YoY, operating income was primarily impacted by the following items:<sup>5</sup>

- reduced ASP due to pricing and mix
- increase in operating expenses driven by Cybertruck, AI and other R&D projects
- cost of production ramp and idle cost related to factory upgrades
- negative FX impact
- + growth in vehicle deliveries (despite the margin headwind from underutilization from new factories)
- + lower cost per vehicle and IRA credit benefit
- + gross profit growth in Energy Generation and Storage as well as Services and Other
- + growth in regulatory credit sales<sup>6</sup>

Cash<sup>7</sup>

Quarter-end cash, cash equivalents and investments increased sequentially by \$3.0B to \$26.1B in Q3, driven by financing activities of \$2.3B and free cash flow of \$0.8B.

<sup>(1)</sup> Impact is calculated on a constant currency basis. Actuals are compared against current results converted into USD using average exchange rates from Q3'22.

OPERATIONAL SUMMARY  
(Unaudited)

	Q3-2022	Q4-2022	Q1-2023	Q2-2023	Q3-2023	YoY
Model S/X production	19,935	20,613	19,437	19,489	13,688	-31%
Model 3/Y production	345,988	419,088	421,371	460,211	416,800	20%
Total production	365,923	439,701	440,808	479,700	430,488	18%
Model S/X deliveries	18,672	17,147	10,695	19,225	15,985	-14%
Model 3/Y deliveries	325,158	388,131	412,180	446,915	419,074	29%
Total deliveries	343,830	405,278	422,875	466,140	435,059	27%
of which subject to operating lease accounting	11,004	15,184	22,357	21,883	17,423	58%
Total end of quarter operating lease vehicle count	135,054	140,667	153,988	168,058	176,231	30%
Global vehicle inventory (days of supply) <sup>(1)</sup>	8	13	15	16	16	100%
Solar deployed (MW)	94	100	67	66	49	-48%
Storage deployed (MWh)	2,100	2,462	3,889	3,653	3,980	90%
Tesla locations <sup>(2)</sup>	903	963	1,000	1,068	1,129	25%
Mobile service fleet	1,532	1,584	1,692	1,769	1,846	20%
Supercharger stations	4,283	4,678	4,947	5,265	5,595	31%
Supercharger connectors	38,883	42,419	45,169	48,082	51,105	31%

<sup>(1)</sup>Days of supply is calculated by dividing new car ending inventory by the relevant quarter’s deliveries and using 75 trading days (aligned with Automotive News definition).  
<sup>(2)</sup>Starting in Q1-2023, we revised our methodology for reporting Tesla’s physical footprint. This count now includes all sales, service, delivery and body shop locations globally.

VEHICLE CAPACITY

During the quarter we brought down several production lines for upgrades at various factories, which led to a sequential decline in production volumes. We made further progress smoothing out the delivery rate across the quarter, with September accounting for ~40% of Q3 deliveries this year, compared to September accounting for ~65% of Q3 deliveries in 2022.

US: California, Nevada and Texas

At Gigafactory Texas, we began pilot production of the Cybertruck, which remains on track for initial deliveries this year. We are expecting the Model Y production rate in Texas to grow very gradually from its current level as we ramp additional supply chain needs in a cost-efficient manner. Production of our higher density 4680 cell is progressing as planned, and we continue building capacity for cathode production and lithium refining in the U.S.

China: Shanghai

Other than scheduled downtime in Q3, our Shanghai factory has been successfully running near full capacity for several quarters, and we do not expect a meaningful increase in weekly production run rate. Giga Shanghai remains our main export hub.

Europe: Berlin-Brandenburg

Model Y remained the best-selling vehicle of any kind in Europe year-to-date (based on the latest available data as of August). Similar to Texas, further production ramp of Model Y will be gradual.

Current Installed Annual Vehicle Capacity

Region	Model	Capacity	Status
California	Model S / Model X	100,000	Production
	Model 3 / Model Y	550,000	Production
Shanghai	Model 3 / Model Y	>950,000	Production
Berlin	Model Y	375,000	Production
Texas	Model Y	>250,000	Production
	Cybertruck	>125,000	Pilot production
Nevada	Tesla Semi	-	Pilot production
Various	Next Gen Platform	-	In development
TBD	Roadster	-	In development

Installed capacity ≠ current production rate and there may be limitations discovered as production rates approach capacity. Production rates depend on a variety of factors, including equipment uptime, component supply, downtime related to factory upgrades, regulatory considerations and other factors.

CORE TECHNOLOGY

Artificial Intelligence Software and Hardware<sup>1</sup>

Software that safely performs tasks in the real world is the key focus of our AI development efforts. We have commissioned one of the world’s largest supercomputers to accelerate the pace of our AI development, with compute capacity more than doubling compared to Q2. Our large installed base of vehicles continues to generate anonymized video and other data used to develop our FSD Capability features.

Vehicle and Other Software<sup>3</sup>

All Tesla rentals through Hertz in the U.S. and Canada now allow Tesla app access, allowing renters to use keyless lock/unlock via phone key, remotely precondition the cabin, track charge status and more. Customers who already have a Tesla Profile will have their settings and preferences seamlessly applied, making the rental car feel like their own. The in-app service experience was also redesigned to allow customers to schedule service, access their loaner, track service progress, pay and manage drop-off/pickup. Prospective customers can similarly schedule, locate and test drive a demo vehicle.

Battery, Powertrain & Manufacturing<sup>5</sup>

Despite macroeconomic headwinds, our planned factory shutdowns in Q3 and ongoing ramp at new factories, our average vehicle cost was ~\$37,500, and we continue to work to reduce the cost further. For very heavy vehicles, a high voltage powertrain architecture brings notable cost savings, which is why Cybertruck will adopt an 800-volt architecture.

Cumulative miles driven with FSD Beta (millions)<sup>8</sup>

Cost of goods sold per vehicle

OTHER HIGHLIGHTS

Energy Storage<sup>1</sup>

Energy storage deployments increased by 90% YoY in Q3 to 4.0 GWh, our highest quarterly deployment ever. Continued growth in deployments was driven by the ongoing ramp of our Megafactory in Lathrop, CA toward full capacity of 40 GWh with the phase two expansion. Production rate improved further sequentially in Q3.

Solar<sup>3</sup>

Solar deployments declined on a sequential and YoY basis to 49 MW. Sustained high interest rates and the end of net metering in California have created downward pressure on solar demand.

Services and Other business<sup>5</sup>

As our global fleet size grows, our Services and Other business continues to grow successfully, with Supercharging, insurance and body shop & part sales being the core drivers of profit growth YoY. Pay-per-use Supercharging remains a profitable business for the company, even as we scale capital expenditures. Our team is focused on materially expanding Supercharging capacity and further improving capacity management in anticipation of other OEMs joining our network.

OUTLOOK

Volume

We are planning to grow production as quickly as possible in alignment with the 50% CAGR target we began guiding to<sup>1</sup> in early 2021. In some years we may grow faster and some we may grow slower, depending on a number of factors. For 2023, we expect to remain ahead of the long-term 50% CAGR with around 1.8 million vehicles for the year.

Cash

We have ample liquidity to fund our product roadmap, long-term capacity expansion plans and other expenses.<sup>2</sup> Furthermore, we will manage the business such that we maintain a strong balance sheet during this uncertain period.

Profit

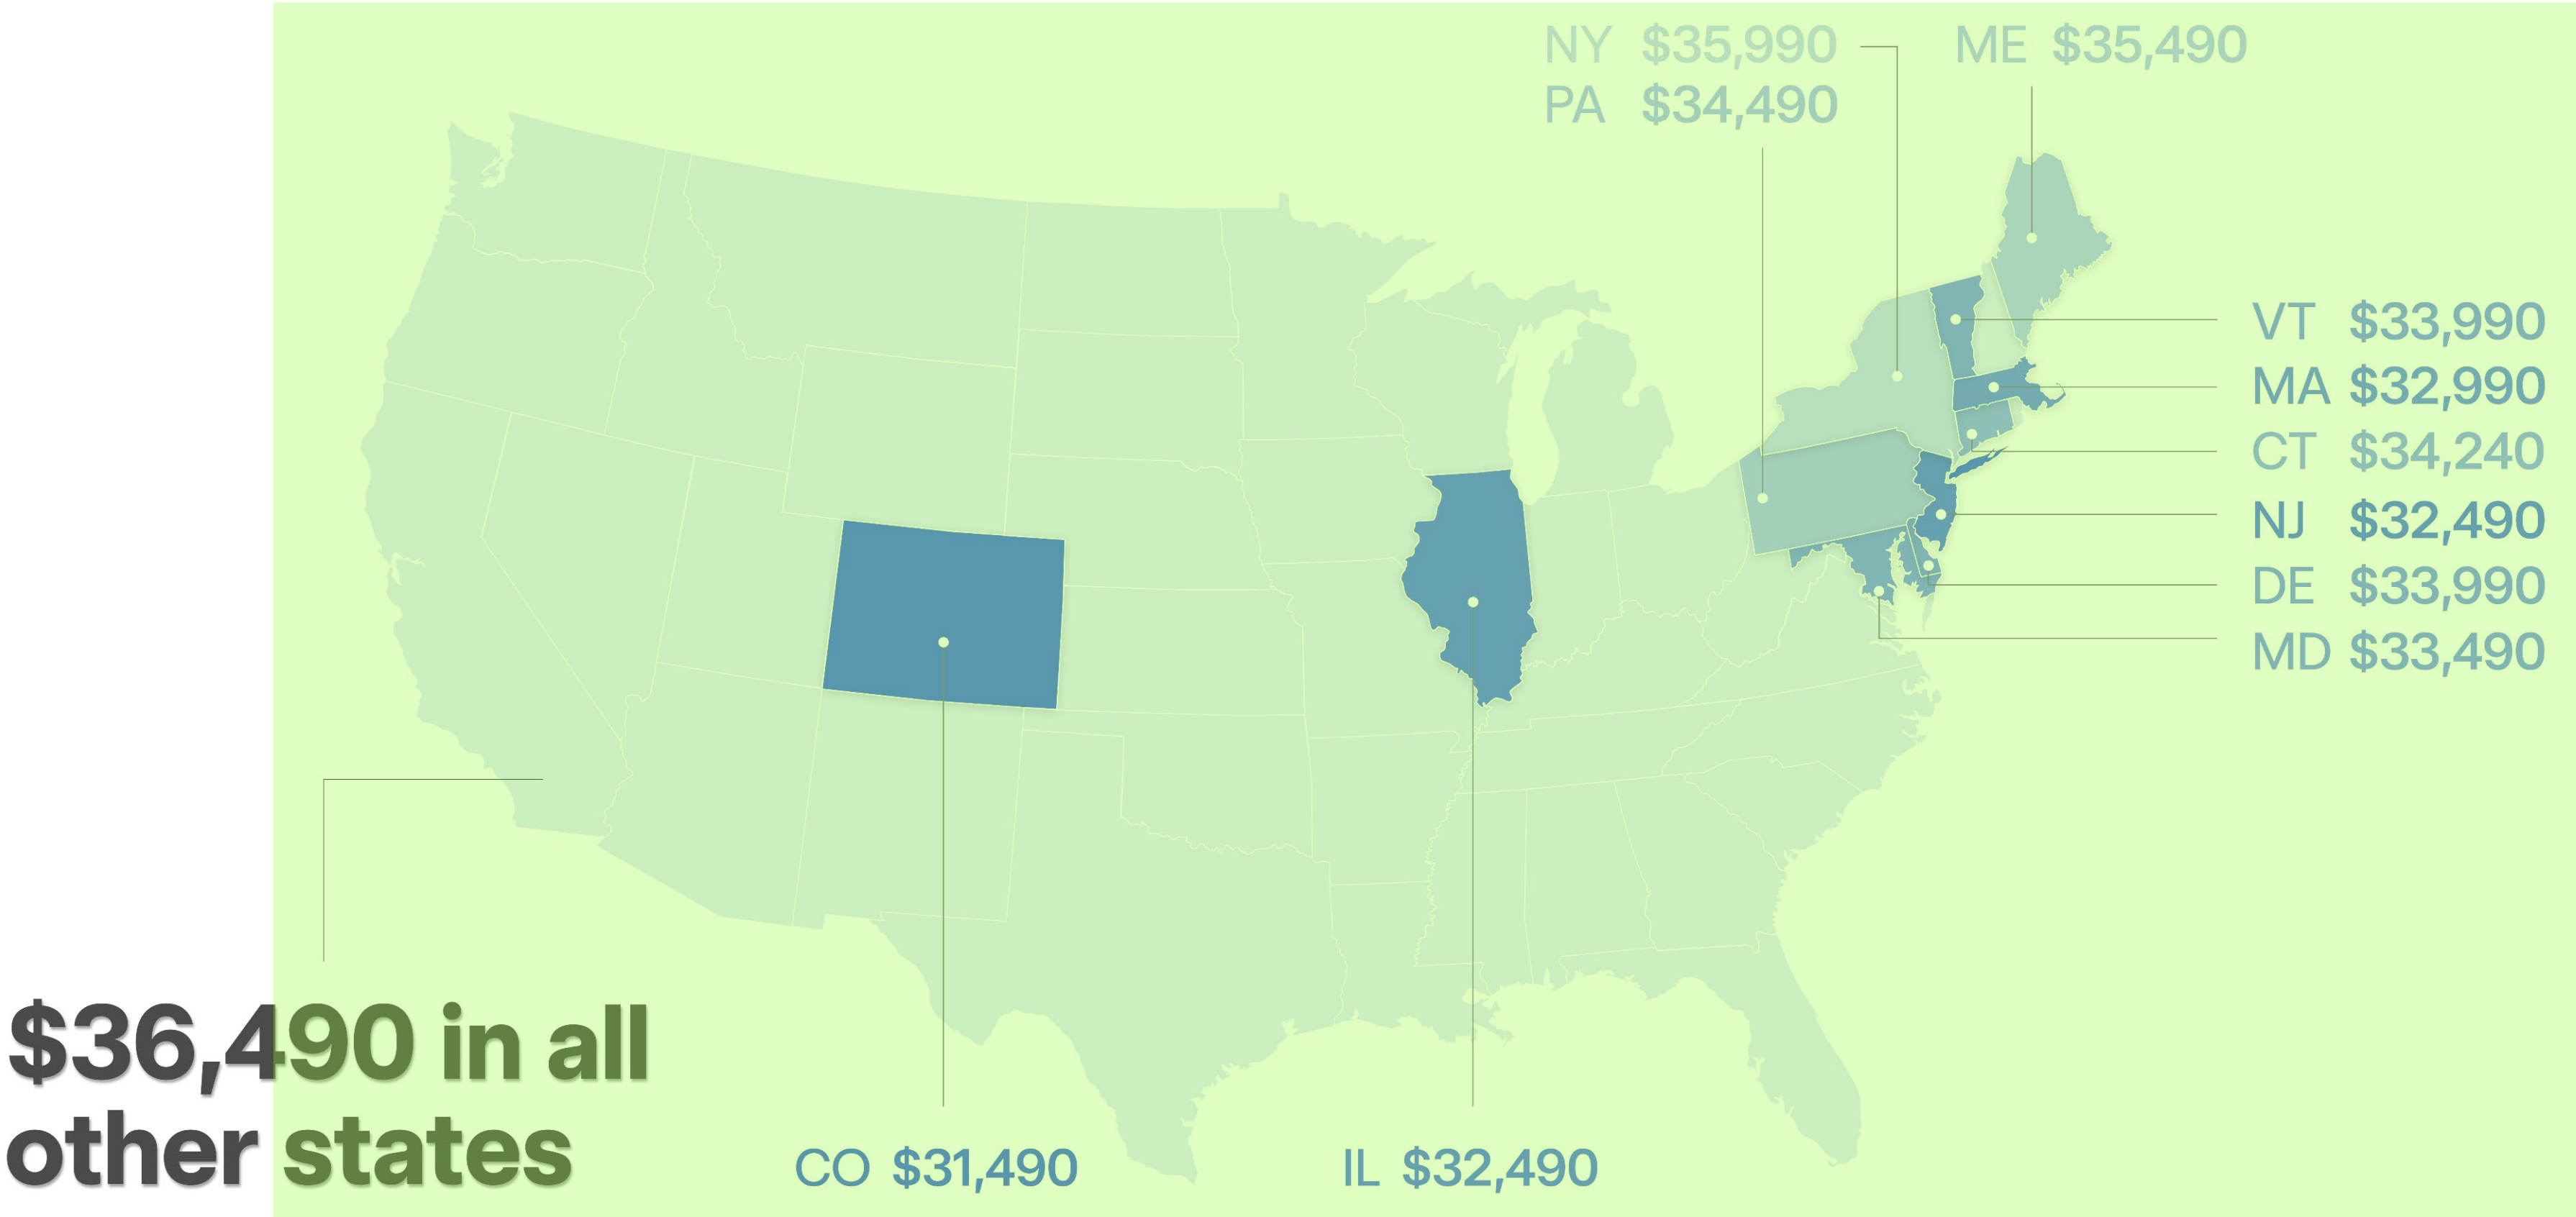

While we continue to execute on innovations to reduce the cost of manufacturing and operations, over time, we expect<sup>3</sup> our hardware-related profits to be accompanied by an acceleration of AI, software and fleet-based profits.

Product

Cybertruck deliveries remain on track for later this year. In addition, we continue to make progress on our next<sup>4</sup> generation platform.

ADDITIONAL INFORMATION

WEBCAST INFORMATION<sup>1</sup>

Tesla will provide a live webcast of its third quarter 2023 financial results conference call beginning at 4:30 p.m. CT on October 18, 2023 at ir.tesla.com. This webcast will also be available for replay for approximately one year thereafter.

CERTAIN TERMS<sup>3</sup>

When used in this update, certain terms have the following meanings. Our vehicle deliveries include only vehicles that have been transferred to end customers with all paperwork correctly completed. Our energy product deployment volume includes both customer units installed and equipment sales; we report installations at time of commissioning for storage projects or inspection for solar projects, and equipment sales at time of delivery. "Adjusted EBITDA" is equal to (i) net income (loss) attributable to common stockholders before (ii)(a) interest expense, (b) provision for income taxes, (c) depreciation, amortization and impairment and (d) stock-based compensation expense, which is the same measurement for this term pursuant to the performance-based stock option award granted to our CEO in 2018. "Free cash flow" is operating cash flow less capital expenditures. Average cost per vehicle is cost of automotive sales divided by new vehicle deliveries (excluding operating leases). "Days sales outstanding" is equal to (i) average accounts receivable, net for the period divided by (ii) total revenues and multiplied by (iii) the number of days in the period. "Days payable outstanding" is equal to (i) average accounts payable for the period divided by (ii) total cost of revenues and multiplied by (iii) the number of days in the period. "Days of supply" is calculated by dividing new car ending inventory by the relevant quarter's deliveries and using 75 trading days. Constant currency impacts are calculated by comparing actuals against current results converted into USD using average exchange rates from the prior period.

NON-GAAP FINANCIAL INFORMATION<sup>5</sup>

Consolidated financial information has been presented in accordance with GAAP as well as on a non-GAAP basis to supplement our consolidated financial results. Our non-GAAP financial measures include non-GAAP net income (loss) attributable to common stockholders, non-GAAP net income (loss) attributable to common stockholders on a diluted per share basis (calculated using weighted average shares for GAAP diluted net income (loss) attributable to common stockholders), Adjusted EBITDA, Adjusted EBITDA margin and free cash flow. These non-GAAP financial measures also facilitate management's internal comparisons to Tesla's historical performance as well as comparisons to the operating results of other companies. Management believes that it is useful to supplement its GAAP financial statements with this non-GAAP information because management uses such information internally for its operating, budgeting and financial planning purposes. Management also believes that presentation of the non-GAAP financial measures provides useful information to our investors regarding our financial condition and results of operations, so that investors can see through the eyes of Tesla management regarding important financial metrics that Tesla uses to run the business and allowing investors to better understand Tesla's performance. Non-GAAP information is not prepared under a comprehensive set of accounting rules and therefore, should only be read in conjunction with financial information reported under U.S. GAAP when understanding Tesla's operating performance. A reconciliation between GAAP and non-GAAP financial information is provided above.

FORWARD-LOOKING STATEMENTS<sup>7</sup>

Certain statements in this update, including statements in the "Outlook" section; statements relating to the future development, ramp, production and capacity, demand and market growth, cost, pricing and profitability, investment, deliveries, deployment, availability and other features and improvements and timing of existing and future Tesla products and technologies such as Model 3, Model Y, Model X, Model S, Cybertruck, our next generation vehicle platform, our Dojo training computers, our Autopilot, Full Self-Driving and other vehicle software and AI enabled products, our battery cells, our Supercharging network and our energy storage and solar products; statements regarding operating margin, operating profits, spending and liquidity; and statements regarding expansion, improvements and/or ramp and related timing at our factories are "forward-looking statements" that are subject to risks and uncertainties. These forward-looking statements are based on management's current expectations, and as a result of certain risks and uncertainties, actual results may differ materially from those projected. The following important factors, without limitation, could cause actual results to differ materially from those in the forward-looking statements: uncertainties in future macroeconomic and regulatory conditions arising from the current global pandemic; the risk of delays in launching and manufacturing our products and features cost-effectively; our ability to grow our sales, delivery, installation, servicing and charging capabilities and effectively manage this growth; consumers' demand for electric vehicles generally and our vehicles specifically; the ability of suppliers to deliver components according to schedules, prices, quality and volumes acceptable to us, and our ability to manage such components effectively; any issues with lithium-ion cells or other components manufactured at our factories; our ability to ramp our factories in accordance with our plans; our ability to procure supply of battery cells, including through our own manufacturing; risks relating to international expansion; any failures by Tesla products to perform as expected or if product recalls occur; the risk of product liability claims; competition in the automotive and energy product markets; our ability to maintain public credibility and confidence in our long-term business prospects; our ability to manage risks relating to our various product financing programs; the status of government and economic incentives for electric vehicles and energy products; our ability to attract, hire and retain key employees and qualified personnel and ramp our installation teams; our ability to maintain the security of our information and production and product systems; our compliance with various regulations and laws applicable to our operations and products, which may evolve from time to time; risks relating to our indebtedness and financing strategies; and adverse foreign exchange movements. More information on potential factors that could affect our financial results is included from time to time in our Securities and Exchange Commission filings and reports, including the risks identified under the section captioned "Risk Factors" in our annual report on Form 10-K filed with the SEC on January 31, 2023. Tesla disclaims any obligation to update information contained in these forward-looking statements whether as a result of new information, future events or otherwise.
